

Sebewaing Light & Water

Commercial & Industrial Energy Efficiency Program

2024 Incentive Application

Ready to start your project? Follow these 3 simple steps.

Step #1: Request Pre-Approval

To ensure that your project is eligible and to reserve funds, please complete, sign and submit:

1. The Pre-Approval Agreement (found on page 2 of this application), completed and signed.
2. The worksheet(s) that are applicable to your project, completed (found on pages 4-13 of this application).
3. Itemized quote/proposal with model numbers from your contractor.
4. If this project is for new construction, please refer to the New Construction application on www.mienergysmart.com.
5. All Projects are subject to inspection before and/or after work is performed.
6. All projects must receive a reservation letter before work is performed.
7. New product specification sheets

Step #2: Complete Your Project

If your project meets the pre-approval criteria, you will receive a letter indicating funds have been reserved. Following the specifications listed in this application, install your equipment within 90 days. Applications that are not completed within 90 days from the date on the acceptance letter are subject to cancellation. All equipment must be installed and operational within 90 days of the date on the acceptance letter or by November 30, 2024, whichever date comes first.

Step #3: Get Your Cash Incentive

Once your project is complete, it's time to request your cash incentive. Within 30 days of project completion, you must submit:

1. The Payment Approval Agreement (found on page 3 of this application), completed and signed.
2. The itemized invoice(s) for materials and any applicable external labor costs, including the following:
 - Contractor's name and contact information
 - Customer's name and contact information
 - Date of invoice
 - Line item cost for each product
 - Quantities of each product
 - Complete product model numbers
 - Labor (and other) expenses listed separately from product costs
 - Total invoice amount

Please submit your documents one of two ways:

Fax 517-203-0658

2024 Energy Smart Commercial & Industrial Program

Pre-Approval Agreement

Pre-Approval Agreement

Please complete and submit this page, along with the appropriate worksheet(s) and quotes with model numbers from your contractor, *before you begin your project*. If you plan to install the equipment yourself (as opposed to hiring a contractor to do so), please submit a quote/proposal for the cost of the equipment from a supplier or distributor. If your project meets the pre-approval criteria, you will receive a letter indicating the funds have been reserved. You can then proceed with completing your project, as described in Step #2 on page 1 of this application.

2024 Energy Smart Commercial & Industrial Program

General Incentive Information / Lighting Worksheet

Introduction to Prescriptive and Custom Incentives

The following pages are prescriptive incentives for energy efficient measures that are for one-for-one replacement. Other replacement options as well as measures that are not on this application may be eligible for custom incentives. Please contact us to discuss custom projects.

Custom Incentives

Custom incentives are based on the first-year energy (kWh) savings.

Payback must be greater or equal to one (1) and less than or equal to eight (8) year to be eligible for a custom incentive. Payback = Incremental Measure Cost (annual kWh Saved x Electricity Rate). Custom incentive cannot exceed 50% of the total custom project cost.

| | | |
|--|--|--|
| When applying for pre-approval of a custom project, you must submit the following items: <ol style="list-style-type: none"> 1. Completed and signed Pre-Approval Agreement (page 2) 2. Project details of existing system and proposed project 3. Itemized quote/proposal for all related materials and any external labor 4. Manufacturer's specification sheets for all equipment | Custom Incentive Rate | |
| | Lighting \$0.10 / kWh | Non-lighting \$0.12 / kWh |

Lighting & Lighting Controls Worksheet (one-for-one unit replacement)

All lighting projects are required to comply with the IESNA recommended lighting levels or local code.

| Measure | Specs | Quantity | \$ / Unit | Total |
|--|---|----------|--------------------------|-----------|
| Interior Fixtures | | | | |
| LED Downlight Fixture | Replace incandescent lamped fixture with ENERGY STAR LED fixture. | | \$20 / Fixture | |
| LED Exit Signs | Replacement or retrofit of an incandescent or fluorescent exit sign with LED. | | \$13 / Fixture | |
| General Lighting Controls | | | | |
| Interior Occupancy Sensors: < 150 sq ft | Available for passive infrared (PIR) and ultrasonic sensors. Sensor installed for single fixture are only eligible for < 150 sq ft with the exception of single highbay fixture which are eligible for the 150-500 sq ft offering. | | \$10 / Sensor | |
| Interior Occupancy Sensors: 150-500 sq ft | | | \$20 / Sensor | |
| Interior Occupancy Sensors: > 500 sq ft | | | \$50 / Sensor | |
| Exterior Occupancy Sensors | Retrofit applications only. Baseline lighting system must operate continuously during night hours. | | \$0.25 / watt controlled | |
| Exterior Multi-step Dimming Time Clock | Controlled lighting fixtures must operate at no more than 50% full rated power for at least five hours per night. | | \$0.10 / watt controlled | |
| Interior Daylight Harvesting Sensor | The controls can be on/off, stepped or dimming and must vary the light output based on the level of sunlight received. The floor plan and control schedule must be submitted. Cannot be used with occupancy sensor. | | \$0.09 / sq ft | |
| Comprehensive Lighting Controls | | | | |
| Incentives for occupancy sensors or daylight controls cannot be received for same areas controlled by comprehensive lighting controls. Control schedule and floor plans must be submitted. | | | | |
| Interior Central Lighting Control | For automated central controls with override capability in interior spaces. Must be programmed considering occupant's schedule. Can include time clocks, package programmable relay panels and complete building automation controls. | | \$0.06 / sq ft | |
| Network Lighting Controls | For central control of interior and/or exterior spaces. Must have step dimming, remote interface and control and small zone control capability. Must be on DLC Qualified Product List of Networked Lighting Controls and include three (3) savings control strategies including but not limited to time scheduling, daylight harvesting, occupancy/vacancy sensing, task tuning, load shedding, or high end trim. | | \$0.17 / sq ft | |
| Lighting & Lighting Controls Worksheet Incentive Subtotal, page 4: | | | | \$ |

Lighting Worksheet continues on page 5.

Lighting & Lighting Controls Worksheet, continued

All lighting projects are required to comply with the IESNA recommended lighting levels or local code.

| Interior Lighting - Non-High Bay | | | |
|--|-------------------------|----------------|------------|
| Incentives are eligible for replacement of interior linear fluorescent fixtures/retrofits. Incentive is \$0.08/kWh for LED. All new fixtures and retrofits must be DLC. Existing wattages used must come off of the Standard Wattage Table below. Use wattage listed on DLC sites for proposed fixture or lamps. | | | |
| Existing Fixture: | | Watts/Fixture: | Quantity: |

|--|

Lighting Worksheet continues on page 6.

Note: Customer acknowledges and agrees that Customer cannot apply for, nor receive, incentives for the same product, equipment or service from more than one utility unless there are both electric and gas savings.

Lighting & Lighting Controls Worksheet, continued

All lighting projects are required to comply with the IESNA recommended lighting levels or local code.

Interior Lighting — All High Bay Lighting, 15 feet and above for ceiling height

Incentives are eligible for replacing High Bay Fixtures with interior High Bay LED fixture, retrofit kits or lamps.
Incentive is \$0.30 per watt reduced. Incentive for DLC *Premium* fixtures or retrofit kits is \$0.40 per watt reduced.
 All new fixtures, retrofits or lamps must be DLC. Existing wattages used must come off of the Standard Wattage Table on page 4.
Use wattage listed on DLC sites for proposed fixture for lamps.

| | | | |

Exterior Lighting

Incentives are eligible for the replacement or retrofit of an exterior fixture with LED fixture, retrofit kit, or lamp which have a reduced input wattage of at least 40%. Incentives are per fixture and are based on the nominal lamp wattage of the original fixture. Incentive is for fixtures that operate less than 24 hours per day. **Incentive is \$0.35 per watt reduced. Incentive for DLC *Premium* fixtures or retrofit kits is \$0.45 per watt reduced.** Existing wattages must come off of the Standard Wattage Table on page 4.
 All new fixtures and retrofits must be DLC. **Use wattage listed on DLC sites for proposed fixture or lamps.**

| HVAC Controls | | | | |
| Building Temperature Controls | Must control central AC and replace a non-programmable building management system. The new system must offer time of day controls and a minimum temperature setback of 8 degrees (heating/cooling). | | \$45 / 1,000 sq ft | |
| Occupancy Sensor Control for HVAC | Installation of new controls to an existing EMS system which automatically control the HVAC system based on occupancy sensors. Provide wiring schematic at the time of submitting pre-approval. | | \$30 / 1,000 sq ft | |
| Constant Volume AHU to VAV | Converting constant volume air handling system to a variable air volume. Must have reheat and supply at least four zones. | | \$450 / 1,000 sq ft | |
| Air Side Economizer | Available for air handling units supplying air conditioning which have none or inoperable economizer controls. | | \$15 / ton | |
| Critical Zone Supply Air Reset Control | Available for addition of critical zone reset (static pressure reset) controls to VAV system. Airflow at each VAV box must be monitored and adjust control sequences must be in accordance to ASHRAE 90.1. | | \$35 / ton | |
| Advanced Rooftop HVAC Control | For addition of enhanced ventilation control to single-zone packaged HVAC units or rooftops. Must include: advanced digital economizer control system, demand control ventilation and VSD supply fan. | | \$80 / ton | |
| Chilled Water Reset 5°F | Available for installing a chiller water reset to allow supply chilled water temperature to increase based by 5°F or 10°F based on either zone demand or outdoor air temperature. Provide reset schedule. Reset schedules with chillers in economizing mode do not qualify. | | \$15 / ton | |
| Chilled Water Reset 10°F | | | \$30 / ton | |
| Optimized Chiller Plant Sequencing | Implementation of automated optimized chiller sequencing in existing chiller plants (2 or more chillers) where the existing chillers currently operate with stand-alone controls. Water-cooled plants must also control corresponding cooling towers and condenser water pumps. | | \$4 / ton | |
| Hotel GREM Controls – A/C with Electric Heat | For sensors which automatically control HVAC equipment. Incentive is for new controls only and is offered per room installed. | | \$65 / Room | |
| Hotel GREM Controls – A/C with Gas Heat | | | \$10 / Room | |

Compressed Air & Industrial Worksheet

| Measure | Specs | Quantity | \$ / Unit | Total |
|---|---|----------|----------------|-------|
| Compressed Air Equipment | | | | |
| VSD Air Compressor (< 301 HP) | Replacement of constant speed compressor with rotary screw compressor controlled by a VSD. Annual operating hours must be more than 2000 hours. Not available for back up/redundant compressor. | | \$150 / HP | |
| Variable Displacement Air Compressor | New variable displacement screw compressor replacing a screw compressor with modulating or load/no load control. Annual operation hours ≥ 4000 hours. | | \$35 / HP | |
| Two Stage Rotary Screw Air Compressor | New two-stage screw compressor of at least 50 HP. | | \$20 / HP | |
| Desiccant to Refrigerated Air Dryer | New externally heated or blower purge air dryer replacing a desiccant dryer. Dryers installed on inlet modulating compressors are not eligible. | | \$4 / SCFM | |
| Heat of Compression Air Dryer | Waste heat from oil-free air compressor used to regenerate desiccant dryer. System HP must be greater than 50. | | \$4 / SCFM | |
| Refrigerated Cycling Thermal Mass Air Dryer | Available for replacing a non-cycling refrigerated air dryer with a cycling refrigerated dryer of equal capacity. | | \$2 / SCFM | |
| Variable Speed Air Dryer | | | \$2 / SCFM | |
| Refrigerated Cycling Digital Scroll Air Dryer | | | \$2 / SCFM | |
| Dew-Point Sensor Control for Desiccant Dryer | Available for dewpoint sensor control as a retrofit or an option on a new dryer. Dryers installed on inlet modulating compressors are not eligible. | | \$5 / SCFM | |
| Compressed Air Storage Tank (If going from < 1 gal/cfm to > 5 gal/cfm, the < 1 to > 3 and < 3 to > 5 measures can be used concurrently. HP and gal/cfm used must be from the trim compressor. Only for screw compressor systems operating greater than 90 psig.) | Existing: ≤ 1 gal/cfm to new ≥ 3 gal/cfm | | \$50 / HP | |
| | Existing: ≤ 3 gal/cfm to new ≥ 5 gal/cfm | | \$50 / HP | |
| | Existing: ≤ 5 gal/cfm to new ≥ 10 gal/cfm | | \$30 / HP | |
| Air Compressor Outside Air Intake | Ducted outside air must provide compressed air supply. Compressor must run at least 2000 hours at 80 psig or greater. | | \$8.50 / HP | |
| Flow Controller | The actual air compressor discharge pressure set point must be reduced by 5 psig. Must be a minimum of 50 horsepower. | | \$10 / HP | |
| Engineered Nozzles | A new compressed air nozzle installed on an open pipe or tube. Usage must be greater than 1000 hours. | | \$150 / Nozzle | |
| Low-Pressure Drop Air Filters for Compressed Air | New low pressure drop filter (PSID ≤ 1 initial differential) replacing a standard coalescing filter. | | \$5 / HP | |
| No-loss Drains – Compressed Air | Replacing manual or timer drains. | | \$175 / Drain | |

2024 Energy Smart Commercial & Industrial Program Refrigeration Worksheet

Refrigeration Worksheet

| Measure | Specs | Quantity | \$ / Unit | Total |
|--|---|----------|----------------------|-------|
| Commercial Refrigeration Systems | | | | |
| Floating Head Pressure Control | Available for systems without control. Controls must vary head pressure based on outdoor air temperature with at least 20°F variance must be achieved in milder weather. Capped at 50% of project cost. | | \$125 / Ton | |
| Anti-Sweat Heater Controls | Controls which monitor relative humidity and turn off anti-sweat heaters when appropriate. | | \$80 / Door | |
| No Heat Reach-In Case Doors | Replace existing case door with special glass door that requires no anti-sweat heat. | | \$150 / Door | |
| LED Grocery Case Lighting | Replace T12 or T8 with DLC listed LED lighting in refrigerator or freezer cases. | | \$40 / Door | |
| Occupancy Sensor for LED Case Lighting | Sensors which automatically turn on LED cooler lighting when motion is detected. | | \$10 / Door | |
| Walk-In or Case Cooler/Freezer ECM | Replacement of PSC or shaded pole evaporator motors with an ECM motor. | | \$100 / Motor | |
| Evaporator Fan Motor Control | Available for walk-in units where fan(s) run continuously. Must lower air flow when there is no refrigerant flow through evaporator. Must be > 15 and < 40 cubic feet. | | \$50 / Controller | |
| Evaporator Fan Motor Control with Demand Defrost – Cooler | Available for walk-in units where fan(s) run continuously and defrost is on a time clock. | | \$4 / Ton | |
| Evaporator Fan Motor Control with Demand Defrost – Freezer | | | \$40 / Ton | |
| Cooler/Freezer Defrost Control | Refrigerator must be used in a commercial setting. Must be > 15 and < 40 cubic feet. | | \$20 / Ton | |
| Cooler/Freezer Door Gaskets | Installation of new gaskets to reduce air infiltration on a cooler or freezer door. | | \$9.00 / Linear Foot | |
| Cooler Night Covers | Vertical covers designed for refrigerated display cases. Incentive is based on linear length of cooler and the time per day covers are used. | | \$1 / Foot / Hour | |
| Cooler Strip Curtains | Installation of new curtains isolating a cold storage area. | | \$5 / ft2 | |
| Freezer Strip Curtains | Installation of new curtains isolating a freezer storage area. | | \$25 / ft2 | |
| High Speed Door (Cooler-Dock) | High speed door replacing strip curtains between a cooler space and dock space. | | \$15 / Door | |
| High Speed Door (Cooler-Freezer) | High speed door replacing strip curtains between a cooler space and freezer space. | | \$70 / Door | |
| High Speed Door (Freezer-Dock) | High speed door replacing strip curtains between a freezer space and dock space. | | \$145 / Door | |
| Recycling of Refrigerators | Refrigerator must be used in a commercial setting. Must be > 15 and < 40 cubic feet. | | \$50 / Unit | |

Note: Customer acknowledges and agrees that Customer cannot apply for, nor receive, incentives for the same product, equipment or service from more than one utility unless there are both electric and gas savings.

Terms and Conditions

- 1. Eligibility:** These incentives are offered by your Energy Smart utility to commercial and industrial electric customers installing energy efficient equipment only. For questions regarding eligibility, call 877-674-7281.
- 2. Incentive Offer:** Energy efficient equipment subject to incentive from your Energy Smart utility must be installed and operational by November 30, 2024. Applicant has 90 days from the date of the acceptance letter to complete the proposed project. Applications that are not completed within 90 days are subject to cancellation. Additionally, invoice(s) related to the equipment upgrade must be submitted to Energy Smart within 30 calendar days of installation (completion) and no later than November 30, 2024. Please keep a copy for your records. Incentives are calculated based on prescriptive incentive rates and shall not exceed the total cost of equipment, labor, and other associated project costs.
- 3. Project Documentation Requirements:** Customer will have to provide your Energy Smart utility with the documentation as listed in the instructions (page 1). If Customer does not provide the required project documents to Energy Smart at pre-approval and payment stages, the project may be disqualified from the program. The project may also be disqualified if pre-approval is not received, unless otherwise noted on the application.
- 4. Energy Efficiency Improvement Qualifications:** Increased energy efficiency resulting from peak shaving, demand limiting, or operating schedule changes does not qualify. To qualify, lighting equipment must have a planned minimum usage of 1,800 hours per year. Non-lighting equipment must have a planned minimum usage of 1,500 hours per year. If Customer's equipment does not meet required usage hours per year, an incentive cannot be offered. If Customer has questions or concerns about above qualifications, Customer may contact Energy Smart to discuss.
- 5. Incentive Limit:** Prescriptive and Custom project applications may receive or cumulate a maximum of \$2,000 combined per customer name and/or business entity each calendar year. Incentive limit is subject to change without notice. Incentives for measures can be up to 100% for Prescriptive projects and 50% for Custom projects of the total project cost of a specific measure but shall not exceed the incentives set by your Energy Smart utility for each measure on the application Worksheet(s).
- 6. Compliance:**
 - a. All projects must comply with applicable federal, state and local laws.
 - b. All equipment must be new or retrofitted with new components.
 - c. The purchase and installation of used equipment is not eligible for incentives. Existing equipment must be removed and/or permanently disconnected.
 - d. Equipment must meet specification requirements as defined in application Worksheets and Equipment Guidelines.
- 7. Payment:** Approved Final Applications will receive payment within 8-10 weeks of signed payment approval. Incomplete applications will either delay payments or result in denial of application approval. Your Energy Smart utility reserves the right to refuse payment and disqualify Customer from participating in the program if the customer or their contractor violates any program Terms and Conditions. The qualified equipment must be installed and operating for the rated life of the product(s) or for a period of three (3) years from receipt of rebate, whichever is more. If the qualified equipment is removed or replaced with less efficient equipment, or if Customer ceases to be a customer of your Energy Smart utility during the three (3) years, Customer shall refund a prorated amount of rebate dollars based on the time installed within thirty (30) days of receipt of notice from your Energy Smart utility.
- 8. Inspection:** Energy Smart staff may conduct inspection(s) of the project site to survey existing conditions and/or newly installed equipment.
- 9. Publicity:** Your Energy Smart utility reserves the right to publicize Customer's participation in this program, unless Customer specifically requests in writing otherwise.
- 10. Program Discretion:** Incentives are available on a first-come, first-served basis. Incentive amounts and offerings are subject to change and/or termination without notice and at the discretion of your Energy Smart utility.
- 11. Disclaimers:** Your Energy Smart utility:
 - a. does not endorse any particular manufacturer, product, labor or system design by offering this program;
 - b. is not responsible for any tax liability imposed on the customer as a result of the payment of incentives. Your Energy Smart utility is tax exempt;
 - c. does not expressly or implicitly warrant the performance of installed equipment or contractor's quality of work (contact your contractor for detailed warranties);
 - d. is not responsible for the proper disposal/recycling of any waste generated as a result of this project;
 - e. is not liable for any damage caused by the installation of the equipment and/or for any damage caused by the malfunction of the installed equipment.
- 12. Participating Trade Ally Program:** Participating Trade Allies must adhere to standards of acceptable behavior and performance. Violation of these standards could result in removal from the program. Should an alleged violation occur, the contractor will be contacted.
- 13. Indemnification:** Customer shall, to the fullest extent permitted by law, indemnify and hold harmless your Energy Smart utility, and their officers, agents and employees harmless from and against all losses and litigation expenses arising out of or resulting from the performance of work hereunder and caused, in whole or part, by any act or omission of Contractor. Your Energy Smart utility shall further be entitled to all cost (which include both internal and external) incurred in the process of enforcing this or any other provision under this agreement. This provision is not intended and is not to be construed as a waiver of the defense of governmental immunity otherwise available nor is it construed as a waiver of the defense of governmental immunity otherwise available nor is it intended to grant third party beneficiary status to any person or entity.
- 14. Governing Law:** This agreement is construed in accordance with Michigan law, without regard to conflict of laws, provisions, and venue is in the county in which the municipality resides.
- 15. Intellectual Property:** No rights in copyright, patents, trademarks, trade secrets, or other intellectual property are granted to contractor and/or subcontractor except as expressly provided under these Terms. Contractor and/or subcontractor will not register or use any mark and/or internet domain name that contains any Energy Smart intellectual property.
