

SUPERINTENDENT, SEBEWAING LIGHT AND WATER

DESCRIPTION

Organization:

The Sebewaing Light and Water Committee is seeking qualified candidates to replace the Superintendent, who will be retiring at the end of January 2019. Sebewaing Light and Water (SLW) is a Public Power Provider formed in 1911 to provide electric and water to the residents of Sebewaing. In 2015 Fiber Broadband was added to the suite of utilities, becoming the first Gigabit Community in Michigan. A new generating plant will be operational in December 2018, designed to provide the primary source of power.

Responsibilities:

Under guidance from the Light and Water Board, the Superintendent is responsible for the overall direction and management of the Department. The primary responsibility of the Superintendent is to ensure a high standard of safety, operational reliability, environmental compliance, customer satisfaction, power supply and financial management.

Requirements:

SLW is a dynamic, high energy utility focused on an open, interactive team approach to leadership. This opportunity is for a leader with excellent communication and people skills, that builds trust, focuses and can thrive in a collaborative team environment.

A bachelor's degree in engineering or other applicable disciplines is preferred. Technical expertise in power supply is not required, but preferred. Proven strategic and tactical level power resource leadership is necessary to protect SLW's recognized operational and financial success. A proven track record interacting with and reporting to a governing body similar to SLW Board is essential.

Candidate Profile:

The successful candidate will be an executive level management professional with proven experience fostering teamwork and articulating clear direction. The successful candidate will be a strong visionary with a proven record of identifying, analyzing, proposing and implementing solutions to municipal utility operational issues. He/she must have proven experience with restoration and recovery efforts from weather related events. Ideal candidate will be able to inspire confidence within the organization and community. In addition, the successful candidate must display a commitment to supporting professional growth and development within the workforce while ensuring succession planning remains a top priority. The ideal candidate will possess comprehensive knowledge of an electrical utility organization and operation.

Compensation and Benefits

The SLW provides a comprehensive benefits package. Salary negotiable and commensurate with experience.

Qualified candidates should email resumes to superintendentslw@gmail.com.
